Growth Doesn't Automatically Happen

The Law of Design, Pain, Ladder

Make plans according to your values. Plans can be simple by asking these questions: Can they be received easily, repeated easily and transferred strategically. Along with good management of bad experiences, leads to great growth and inside victories preceded by outside victories

The Law of Modeling, Expansion, Contribution

Individuals and groups that know the way, go the way, and show the way. Expansion involves finding the edges and moving them out for growth. At the beginning of the day be open to doing good. Be a river not a reservoir.

The Law of Intentionality, Awareness, and the Mirror

Growth Doesn't Just Happen

James Allen, "People are anxious to improve their circumstances but are unwilling to improve themselves; they therefore remain bound."

The Law of Reflection, Consistency, Environment

Reflection turns experience into insight
Do you know why you want to improve?
Do you know when you are supposed to improve? Set milestones for growth, focus on the moment, move forward.

The Law of Rubber Band, Trade-offs, Curiosity

Growth stops when you lose the tension between where you are and where you could be. When we grow we find we have to make choices ~ what do we have to give up to go up? Curiosity creates a beginners mindset ~ we don't know what we don't know. When we learn we grow!

The Laws Work

The longer you wait to do something you should do now the greater the odds that you will never do it.

The best time to do something you know you should do is now.

When you begin you will begin to have the success you want in life!!!
